

## DAVID L. BEJOT, OD

### *I became a doctor because*

"I became an optometrist because I truly have great satisfaction in helping others. Most everyone will agree that sight is one of the most valued senses of the human body. I feel the best when I know I have made a difference in a patient by helping them preserve their vision, which ultimately will make their quality of life better. It is extremely important that one gives back to their profession. Next to helping patients, I enjoy the teaching and mentoring aspect of being a doctor. My many years working at The Eye Center of Toledo with premier surgeon Kevin L. Alexander, OD, PhD, has enabled me to pass along clinical skills and academic knowledge to students. I thoroughly enjoy teaching and instructing future doctors from Ohio State, Indiana, and Michigan College of Optometry, and local family practice residents within the greater Toledo area."

**Certification:** National Board of Optometry

**Residency:** Ocular disease residency at The Ohio State College of Optometry

**OD:** The Ohio State College of Optometry

**Colleges:** University of Nebraska, The Ohio State University, University of Toledo

**Teaching Appointments:** Clinical Associate Professor; Ohio State University College of Optometry; Director of Ocular Disease Residency; Ohio State College of Optometry Extern Director; Ohio State College of Optometry

**Professional Accomplishments:** 2002 Ohio Young Optometrist of the Year, Optometric Director, TLC Eyecare & Laser Centers at The Eye Center of Toledo

**Member:** Ohio Optometric Association; American Optometric Association; OSU Alumni Committee; Epsilon Psi Epsilon (EYE) Alumni Board; chairman

"My top priority is to make sure each and every patient feels they are receiving great care, have access to the best doctors, and cutting edge technology. I feel it is extremely important that every member of our staff treat our patients with respect and answer all questions with a smile. I always try to answer every question a patient or family member may ask in the easiest fashion, so that everyone understands the problem and how to manage it. We are committed to providing all patients the best eye care possible."
